

AIR FLOW® PROPHYLAXIS MASTER UNIT

AIR-FLOW® MASTER PIEZON UNIT

By asking your oral hygienist for EMS GBT, you are opting for the 'gold standard' in professional oral hygiene and gum disease preventative treatment.

Refer to our list on [ivohealth.co.za/no-pain-professional-cleaning](http://ivohealth.co.za/no-pain-professional-cleaning) for dental practices around South Africa that use the EMS system. All the oral hygienists listed have completed the Swiss Dental Academy's (SDA) professional training programme (through Ivodent SA) to ensure your cleaning regimen is effective and the experience a pleasant one.

# A GAME CHANGER FOR PROFESSIONAL ORAL HYGIENE CLEANING

Regular visits to your dentist and oral hygienist ensure healthy teeth and gums, essential in helping to keep your overall health in tip top shape. EMS Guided Biofilm Therapy® offers a gentle, yet effective, high pressure airflow treatment, that targets plaque build-up (also called biofilm). With the launch in South Africa of this breakthrough product, you can now enjoy naturally healthy, stronger teeth and gums.

## PRESERVE HEALTHY TEETH

The EMS dual-action system is a breakthrough concept in plaque removal, offering a combination of a gentle Airflow® plus powder treatment that provides effective, fast, pleasant cleaning and polishing in one single procedure and a Piezon® NO PAIN technology scaler to remove calculus.

"I FEEL GOOD"

Guided Biofilm Therapy removes stubborn stains and discolourations, for a beautiful, healthy smile.

## PREVENT PLAQUE BUILD UP

A build-up of plaque and calculus on natural teeth, restorations, crowns, bridges and implants is the common cause of gum disease and tooth loss. The use of a plaque disclosing formula during the treatment highlights the problem areas, guiding the hygienist to an effective clean - ensuring nothing is missed. They can then advise the patient on how to improve their cleaning technique in these neglected spots and guide them to customise their homecare cleaning. Using this system to clean around orthodontic appliances is also simple and highly effective.
